

## IMAGE PERFECT LASER

COSMETIC TREATMENTS

### TREATMENTS

#### Laser Hair Removal

If noticeable hair is making you self conscious – like on the face, neck, abdomen, back, bikini, legs, or anywhere – and if you are tired of wasting time and money on temporary remedies such as shaving, plucking, waxing, or chemical depilatories, Laser Hair Removal is an excellent alternative.

Laser Hair Removal is the most effective solution in removing unwanted hair quickly and permanently for women and men. The LightSheer laser produces a beam of highly concentrated light that is well absorbed by the pigment located in hair follicles. The laser pulses just long enough to heat the hair, which impedes the follicle's ability to re-grow.

The length of a laser treatment may last anywhere from a few minutes to an hour or more depending on the areas treated. Even the largest body-areas can be treated quickly and effectively. We typically attain an 80-90% permanent reduction when the treatment is repeated 4 times and spaced 6-8 weeks apart. Topical anesthetic creams are recommended for pre-treatment to minimize pain and increase comfort.

Sample Procedures	Time	1 Visit	Pkg. (4)
<i>female</i>			
chin	15 min.	\$150	\$450
upper lip	15 min.	\$150	\$450
upper lip/chin combo	20 min.	\$200	\$650

neck (back)	15 min.	\$150	\$450
chest only	30 min.	\$250	\$850
chest/abdomen	60 min.	\$400	\$1,350
shoulders	60 min.	\$400	\$1,350
full back	2 hrs.	\$700	\$2,500

#### Photorejuvenation – IPL (Intense Pulsed Light)

Facial imperfections or abnormalities can detract from your well being and appearance, no matter how healthy and young you feel. IPL technology is a treatment breakthrough that can correct a variety of benign skin conditions, including age spots, freckles, unsightly small veins, blemishes, broken capillaries, and other skin imperfections. It offers a safe, non-invasive solution that can be tailored to your individual skin type and condition.

Photorejuvenation restores your skin's smooth, youthful look with very low risk and no downtime. Any area of the body with visible sun damage, such as the neck, chest, arms, and hands, can be treated effectively. Though it varies depending on the individual's need, treatment is generally administered in a series of 3 sessions that provide excellent long-term results, minimal adverse effects, and high satisfaction.

<b>Sample procedures</b>	<b>Time</b>	<b>1 Visit</b>	<b>Pkg. (3)</b>
face (female/male)	45 min.	\$400	\$1,100
face/chest combo	75 min.	\$600	\$1,600
hands	15 min.	\$125	

### **Visia Complexion Analysis**

Using a revolutionary complexion analysis system developed with Proctor & Gamble we are able to offer you a 3 dimensional "snapshot" of your skin, both surface level and subsurface. This system can identify and evaluate your complexion for UV spots, wrinkles, evenness, pore size and bacteria. Upon completion of the analysis, we will personalize a treatment plan for you with options to improve your skin both inside and out. You will also receive a full report with color photos to take home.

30 minute session \$75

*\*Complimentary with purchase of IPL (Intense Pulsed Light) series*

### **YAG Laser**

The YAG laser is a laser used in various cosmetic applications. It is highly effective in treating skin conditions, especially cherry angiomas (red moles), telangiectasia (leg or facial veins), and wrinkles. The YAG laser transfers heat to the tissue below the skin surface, which stimulates the production of collagen, elastin, and other proteins vital to skin integrity. Because this process works from below, there is no damage to the top layer of the skin.

The procedure can last 10-30 minutes depending on the area being treated. It is virtually painless with little to no downtime. Topical anesthetic creams are a pre-treatment option for additional comfort. The results vary from individual to individual but are visible in a matter of days.

<b>Sample Procedure</b>	<b>Time</b>	<b>1 Visit</b>
miscellaneous vessels	20 min.	\$200
